SUMMARY

Passionate computer science student with expertise in MERN stack development, adept at creating responsive UIs using React.js, CSS, Tailwind CSS, and Bootstrap. Knowledgeable in Node.js and MongoDB. Enthusiastic about exploring new technologies, committed to continuous learning, and known for a strong work ethic.

PROJECT

aDColumn

Frontend Dev Feb 2024 - May 2024

The purpose of the aDColumn is to streamline the process of planning, booking and scheduling the advertisement, in print editions of newspapers. It serves as a standalone system tailored to the needs of newspaper publishers, and advertisers. The product acts as an interface between advertisers and newspaper publishers on a single platform.
